Skills

Programming Languages

Python: Proficient in writing scripts, automating tasks, and developing small applications. Comfortable with basic data structures and algorithms.

Front-End Development

HTML & CSS: Capable of creating structured and styled web pages with responsive design principles.
JavaScript: Able to implement interactive features, manipulate the DOM, and work with events and APIs.

React: Experience building component-based user interfaces, managing state, and integrating third-party libraries.

Projects

Travel Website: Developed a responsive travel booking website featuring interactive destination cards, search functionality, and a visually appealing layout using HTML, CSS, and JavaScript. Integrated dynamic content rendering with React.

E-commerce Website: Created a user-friendly e-commerce platform with product listings, shopping cart, and checkout flow. Implemented state management with React and used mock APIs to simulate product data.

Personal Portfolio: Designed and deployed a personal portfolio website to showcase projects and skills. Built using HTML, CSS, and JavaScript with responsive design.
